

3 POSITION
HANDLE
TIER 2-NEUTRAL-TIER 1

Toilet Tank with Flush Device Installed

Tier 1 Flush

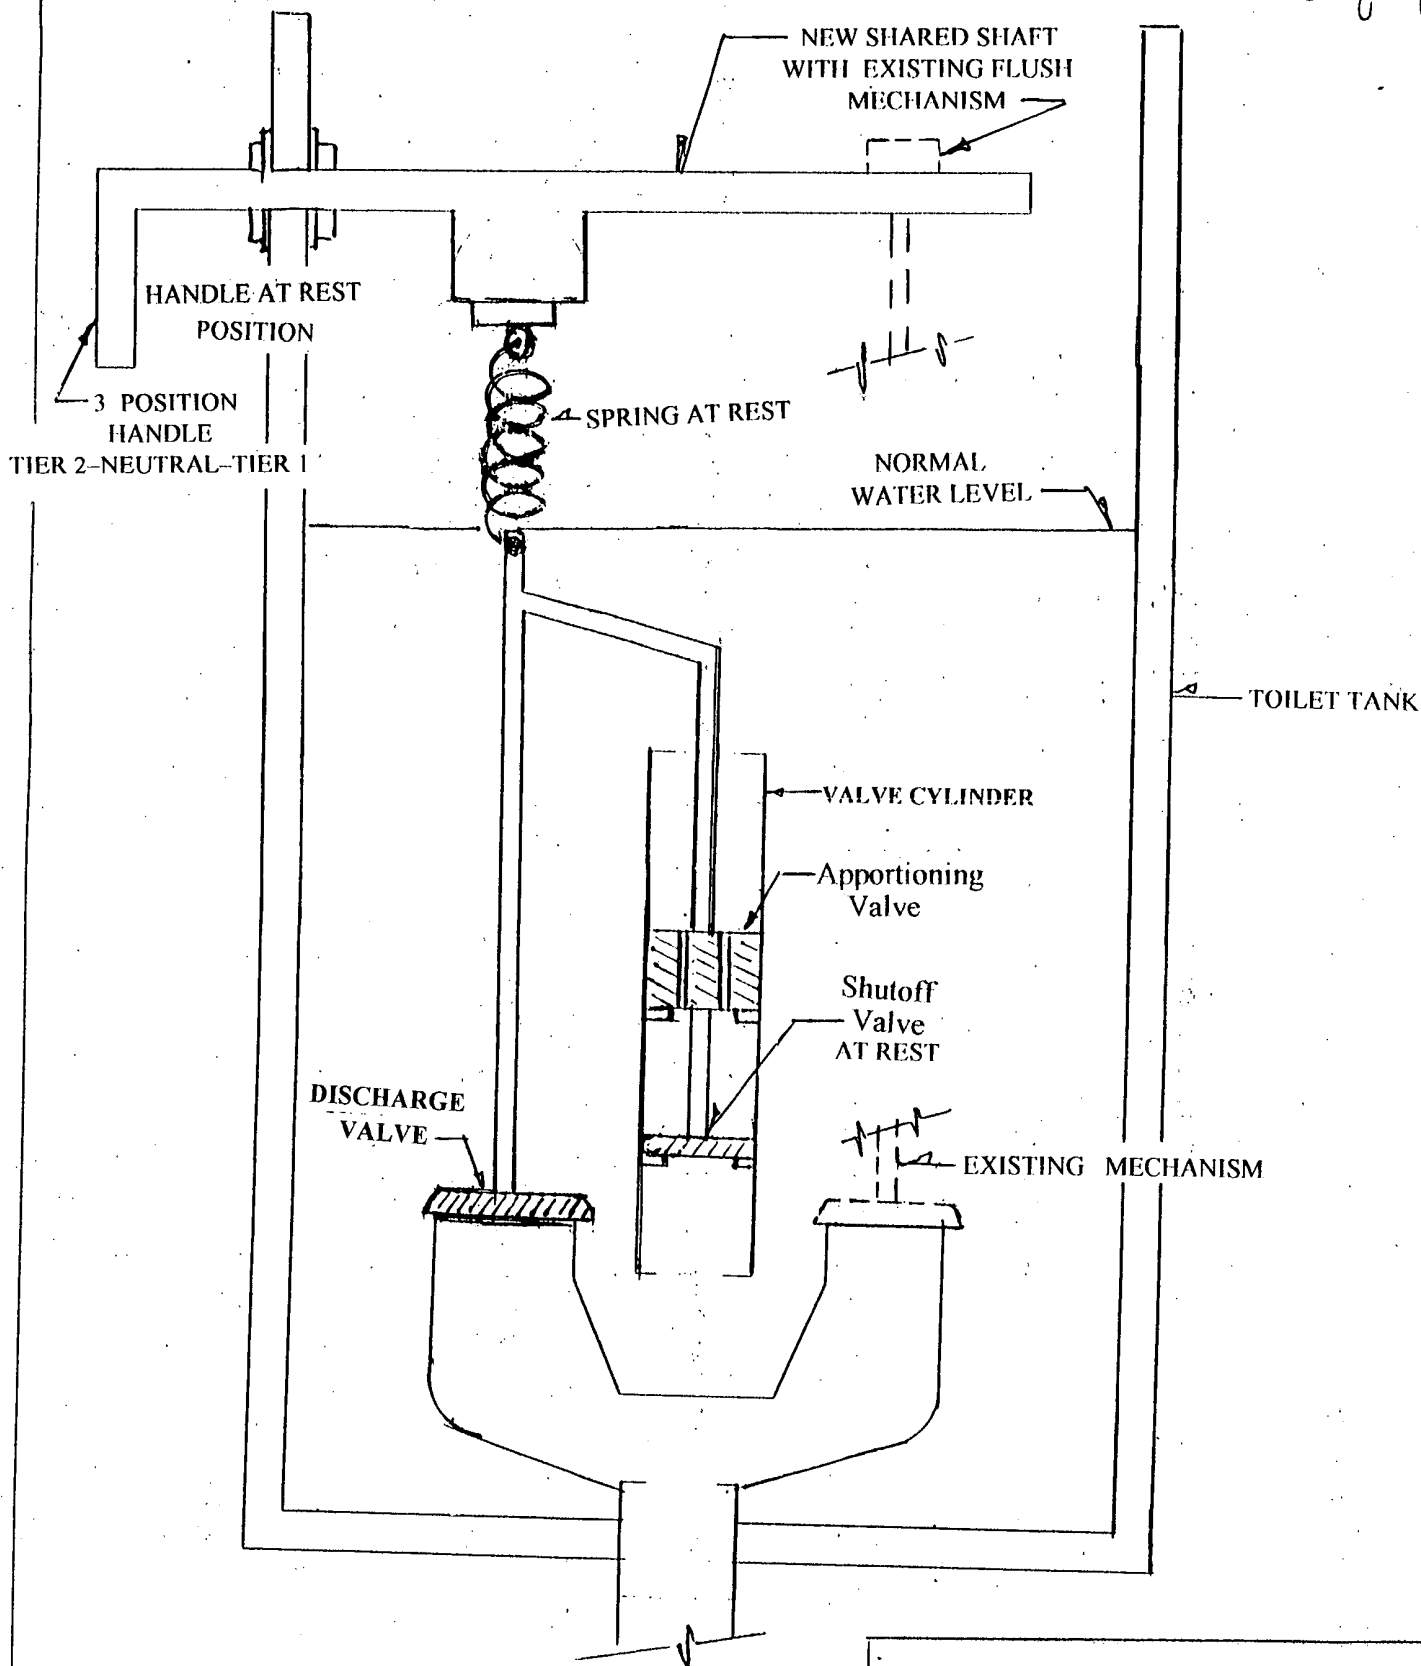

Toilet at Tier 2 and 1 Flush Positions

- NOTES:
1. There is a substantial savings of water between that which is used for the Tier 1 flush and the full Tier 2 flush. Tier 2 flush is most often used once daily, while Tier 1 flush may be required four or five times in the same time period. Consider this for a day for a family or a community.
 2. Existing Toilet Mechanism not shown.
